

**INSURANCE
DATA
SOLUTIONS**

Stand 21 9/11/17 Broker Expo

IDS is helping brokers and MGA's take control of their data to maximise its value. We are very excited to demo four data solutions specifically built for MGA's and Brokers.

MIGRATIONS

COMPETITIVE FIXED PRICE INSURANCE DATA MIGRATIONS

Watch our On-Demand Data Migration Solution (ODMS) in Action. Allowing you to migrate policies yourselves on renewal and overcome issues around EDI.

As leading experts in migrating all classes of business with granular knowledge of most insurance systems we can advise you on the best options when changing systems. We offer full end to end migrations including clients, policies, risk details, documents and financials, ensuring EDI for personal lines and MID for motor.

ARCHIVING

COST EFFECTIVE INSURANCE DATA ARCHIVING SOLUTION

Try out our Insurance Data Archiver to store legacy data on a cost effective modern platform giving you the ability to decommission old technology and reduce issues around; maintenance, licencing, storage costs and regulatory compliance.

Customer data from different systems can be linked giving a single client view. Dashboards offer valuable insight and the opportunity to win back business.

ANALYTICS

MGA & BROKER DASHBOARD SOLUTIONS

View Business Intelligence Dashboard Packs we have developed for Brokers and MGA which offer a complete view of your KPI's and metrics through interactive data visualization using Tableau & MI reports including triangulations.

Giving you the tools to understand niche customer segments and the performance of products, distribution channels and campaigns. Includes a data warehouse optimised for multiple data sources.

BORDEREAUX

BORDEREAUX AUTOMATION & TRANSFORMATION SOLUTION

Learn how you can efficiently produce out-going bordereau for any line of business by year of account and gain agility to easily adapt to changes.

Consolidate and standardise Premium, Risk and Claims incoming bordereaux.

Ensure data quality and get your data into a consistent format to report on and understand risk exposure.
